Mr. Edward F. Slattery  
President  
Facilities Systems Engineering  
Corporation  
8933 S. La Cienega Boulevard  
Inglewood, California 90301

Dear Mr. Slattery:

Thank you for visiting with us on 1 August and for sharing information regarding the Facilities Systems Engineering Corporation's "Shared Energy Savings Project."

As promised you at the 1 August meeting, your proposal was thoroughly reviewed by our engineers in the Office of Logistics. They found that the Shared Energy Savings Project does, indeed, have a number of technical and economic advantages. However, they do not believe that it would be suitable for us to pursue the concept at this time. The principal obstacle to our adopting such a system is that we do not have a sufficient amount of undeveloped land on our Headquarters Compound to support a cogeneration facility as outlined in the study.

In addition to the Office of Logistics, I forwarded the study to several other components in the Agency whose mission might require a cogeneration facility. At this time, there is no positive expression of interest.

We will keep your study on hand and, if a need arises for your concept in the future, we will certainly be in contact with you.

Thanks again for giving us an opportunity to become acquainted with your proposal.

Sincerely,

John M. Ray  
Director of Logistics
